

ARPITA PAL

Product Designer & Frontend Engineer (UI/UX)

+91-7439064671 | apal59349@gmail.com | Kolkata, WB, India

Portfolio | Behance_Portfolio | LinkedIn | Github

PROFESSIONAL SUMMARY

Product Designer & Frontend Engineer with 3+ years of experience crafting end-to-end digital products, enterprise applications, and scalable design systems across FinTech and corporate sectors. Holds an M.Tech in Computer Science from Jadavpur University, uniquely bridging user research, interaction design, product strategy, and technical frontend feasibility. Expert in transforming complex requirements into intuitive user flows, wireframes, interactive Figma prototypes, and accessible component libraries, collaborating alongside Product Managers and Engineering leads to accelerate product delivery cycles by ~30%.

SKILLS & COMPETENCIES

Product & UX Design	Figma (Auto-Layout, Variables, Component Sets, Prototyping), Adobe CC (Illustrator, Photoshop, XD), Sketch, User Flows, Wireframing, Information Architecture (IA), Journey Mapping
Design Systems & UI	Figma Design Tokens, Scalable Component Libraries, Design Specs, Style Guides, Responsive Web & Mobile Layouts, High-Fidelity UI Design, Multi-Theme Foundations
Research & Accessibility	Stakeholder Interviews, Usability Testing, Heuristic Analysis, WCAG 2.1 AA Compliance, Inclusive Design Standards, Design QA Auditing
Frontend Engineering	HTML5, CSS3, SCSS, JavaScript (ES6+), TypeScript, Angular (v16+, Signals), React, RESTful API Integration, Component Architecture, Performance Optimization
Tools & AI Workflows	ChatGPT, Claude, Fabric.js, Git, GitHub, VS Code, Postman, Agile/Scrum Methodologies

WORK EXPERIENCE

UI/UX Designer & Frontend Developer | Consectus LTD Mumbai, India | Feb 2025 – Jun 2026

FinTech Product Design & Onboarding: Spearheaded end-to-end user flows, wireframes, and interactive Figma prototypes for enterprise banking onboarding and account management, simplifying multi-step verification for thousands of active enterprise users.

Enterprise RPA Automation Dashboard: Architected and designed the Consectus RPA Portal from scratch, establishing real-time telemetry dashboards, bot execution status monitors, agent allocation controls, and alert notification dialogs.

Scalable Design System & Component Library: Created and documented modular Figma design tokens and led the development of reusable UI component libraries in Angular, reducing UI sprint implementation time by ~30% and enforcing WCAG 2.1 AA standards.

Cross-Functional Design Handoff: Partnered closely with Product Managers, Backend Developers, and QA engineers in Agile sprints to conduct design reviews and author comprehensive design specifications using AI documentation tools.

Web Designer & Developer | Websofttechs Kolkata, India | Aug 2022 – Mar 2024

End-to-End Product UX: Led end-to-end UX/UI design for 12+ responsive web applications and corporate admin portals across multiple industry verticals, taking concepts from user research to production-ready design assets.

Figma Prototyping & Client Alignment: Created sitemaps, wireframes, and high-fidelity interactive prototypes in Figma, conducting client design reviews to validate product requirements against business goals.

Accessibility & UX Optimization: Audited and optimized client web portals for accessibility compliance, responsive layout integrity, and web performance, resulting in a ~40% improvement in page load speeds and user accessibility.

UI/UX & PRODUCT DESIGN PROJECTS

Banking HUB — Enterprise FinTech Banking Portal | Product Design | Figma | Angular | Design Systems | Accessibility

Problem: Enterprise banking onboarding and transaction management suffered from fragmented navigation and non-standardized UI patterns across tablet and desktop interfaces.

Research & Discovery: Evaluated financial regulatory constraints, security compliance flows, and user journey pain points to map streamlined account verification workflows.

Design Execution: Created detailed sitemaps, user flows, low-to-high fidelity Figma wireframes, and interactive prototypes; delivered pixel-perfect design specifications for engineering teams.

Design System & Impact: Built a scalable UI component library linked to Figma design tokens, ensuring strict accessibility compliance and cutting frontend sprint turnaround times by ~30%.

RPA Portal — Enterprise Automation & Bot Telemetry Dashboard (Consectus LTD) / *Product Design* / *UI/UX* / *Figma* / *Data Visualisation* / *Angular* / *Dashboard UX*

Problem: Enterprise operations teams lacked centralised visibility to monitor RPA bot execution states (Processed, Allocated, Failed, Pending) and system incident alerts in real time.

User Insights & Architecture: Conducted workflow mapping with operations teams to define key operational telemetry metrics, alert triggers, and high-contrast UI modes.

Design Execution: Designed data-visualisation dashboards, live bot status toggles, telemetry reporting modules, and email alert modal flows in Figma.

Outcome: Unified bot orchestration into an intuitive dashboard interface, drastically cutting MTTR (Mean Time To Resolution) for failed automation tasks.

LexAI — AI Legal Platform & Case Intake Interface / *Product Design* / *AI UX Patterns* / *Figma* / *React* / *Workflow Design*

Problem: Legal professionals experienced significant friction and cognitive overload when searching complex legal repositories and processing case intake documents.

Design Execution: Designed intuitive AI search interfaces, automated case summary cards, client onboarding flows, and structured case management dashboards in Figma.

Outcome: Transformed complex legal workflows into an accessible AI-assisted platform, improving user onboarding efficiency and document analysis speed.

EDUCATION

Jadavpur University <i>M.Tech – Computer Science & Engineering</i>	Jul 2023 – Jun 2026 CGPA: 7.70 / 10
Dream Institute of Technology <i>B.Tech – Computer Science & Engineering</i>	Jul 2018 – Jul 2022 CGPA: 8.80 / 10

INTERESTS & LANGUAGES

Interests: Design Systems & Tokens, UX Research Methods, Human-Computer Interaction (HCI), Strategic Chess, Tech Writing

Languages: English (Proficient) | Bengali (Native) | Hindi (Proficient)
